iTunes Description

Tweet7 - the beauty and simplicity an iOS 7 Twitter app deserves.

Experience Twitter in a whole new way! Tweet in a clean, gorgeous user interface that keeps your focus on what's going on and helps you leverage the power of information and interaction.

Dropping traditional navigation patterns, Tweet7 leaves only one button on your screen, hiding the rest of the menu items. Accessing Mentions, Messages and your Profile is done in an elegant way by sliding a layer for each of them from the side of the screen.

Main features

★ A UI that is in perfect harmony with iOS 7

Experience Twitter in a flat, minimalistic design built for iOS 7. We've "cleaned up" your screen from menu buttons and brought forward what is most important to you: your interactions. Pull out the menu items layer

by layer from the bar on the right hand side; pull down your feed for Search.

★ **Background fetching** - keeping your information always up-to-date.

★ **Dynamic Fonts**

★ **Inline image preview**

★ **Local (background) notifications**

Features not included:

- native push notifications
- editing lists

Coming up:

- multiple accounts
